What is DTF printing? 什么是DTF打印?

The DTf process is as simple in its working as its name suggests-Print on a film and directly transfer onto fabric. The most prominent factor that makes this process worthy of use across a larger number of people is the freedom to choose almost any fabric. Be it polyester,cotton, silk or synthetic fibres like rayon or terry cot, the DTF printing process will definitely work its magic on them.

DTF工艺正如其名称所暗示的那样简单-在薄膜上打印并直接转移到织物上。使这一过程值得更多人使用的最突出因素是几乎可以自由选择任何面料。无论是涤纶、棉、丝绸还是人造纤维或毛圈布等合成纤维, DTF印刷工艺肯定会对它们产生魔力
